

BIRD SCALES

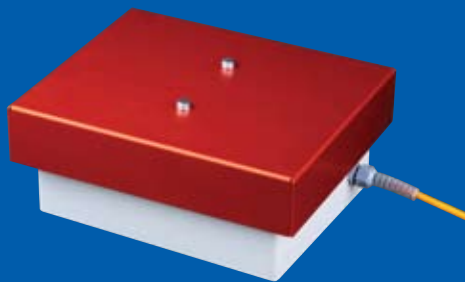

Leading in the development of electronic control systems for poultry since 1988.

Agro Logic® Chick Scale 103

Agro Logic® Chick Scale 205

Chick Scale 103

A Portable, Low-Cost Manual Scale for Poultry

- The scale records the weight of each bird and the number of birds weighed, then calculates the average weight, standard deviation and coefficient of variation. Operates in either pounds or kilograms.
- It operates on rechargeable batteries, and its internal memory accommodates up to nine different batches.
- All information may be recalled at the unit itself or downloaded to a PC via USB cable with the included PC program. Data can also be printed from a PC.
- The Chick Scale 103 is powered by an internal rechargeable battery for up to 12 hours of operation and is supplied with a battery charger. It can also be charged through a PC's USB port.
- Includes sturdy carrying case.

Technical Specifications

Capacity - Maximum of 22 pounds (10 kilograms)

Display - 4 digits

Power - Internal 3.6 volt rechargeable batteries with 110 volt AC charger

Chick Scale 205

Connect the Chick Scale 205 to Two Stationary or Hanging Weighing Platforms for 24-Hour Weighing

The use of a platform scale has the advantages of a large sampling and reduced labor. Use the data to control delivery time and for early warning of health problems.

- Weighing platforms can be up to 3,280 feet (1,000 meters) away from the control unit.
 - The scale records the birds' weights and the number of birds weighed, and also calculates the average weight, standard deviation and the coefficient of variation.
 - Up to 100 days memory of average weight.
 - The Chick Scale 205 can be used to record mortality and feed consumption.
 - Programmable for use with broilers, pullets and broiler breeders.
- All information may be recalled at the unit itself or downloaded to a PC using an optional communication box with the available PC program. When connected to a parallel printer, an automatic report will print every 24 hours.

Technical Specifications

Capacity - Maximum of 22 pounds (10 kilograms)

Output - Can be connected to PC or printer with parallel port input

Memory - Includes power failure protection and battery back up

Power - 110 volt AC (optional 220 volt AC)

DELIVERING EXCELLENCE

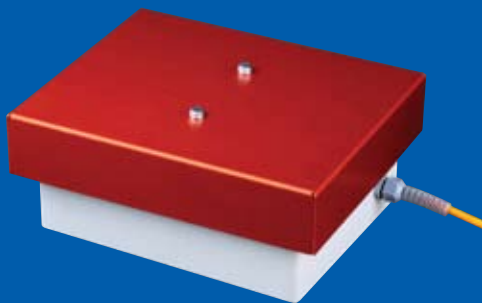

BIRD SCALES

Leading in the development of electronic control systems for poultry since 1988.

Agro Logic® Chick Scale 850

Chick Scale 850

Connect the Chick Scale 850 to Eight Stationary or Hanging Weighing Platforms for 24-Hour Weighing

The use of a platform scale has the advantages of a large sampling and reduced labor. Use the data to control delivery time and for early warning of health problems.

- Weighing platforms can be up to 3,280 feet (1,000 meters) away from the control unit.
- The scale records the birds' weights and the number of birds weighed, and also calculates the average weight, standard deviation and the coefficient of variation.
- Up to 100 days memory of average weight for each platform with a printable curve.
- The Chick Scale 850 can also record mortality, mortality percentage, feed consumption and calculated feed conversion.
- Programmable for use with broilers, pullets and broiler breeders.

All information may be recalled at the unit itself or downloaded to a PC using an optional communication box with the included PC program. When connected to a parallel printer, an automatic report will print every 24 hours.

Technical Specifications

Capacity - Maximum of 22 pounds (10 kilograms)

Output - Can be connected to PC or printer with parallel port input

Memory - Includes power failure protection and battery back up

Power - 110 volt AC (optional 220 volt AC)
