

FEED SCALES

Leading in the development of electronic control systems for poultry since 1988.

Agro Logic offers a complete line of feed scales for precise, electronic feed control.

Feedtronic™ 4004

Electronic Bin Weighing System with Load Cells

The Feedtronic 4004 is a precise low cost electronic feed bin weighing system especially designed for feeding in breeder and pullet houses. The Feedtronic 4004 can also be used in broiler and layer houses for feed consumption control. It can control up to two in-line bins.

- Daily feed consumption.
- Total feed consumption.
- Amount of feed delivered from truck to feed bin.
- Water consumption.

Technical Specifications

Maximum load - 40,000 lbs. (18 mT)

Comes standard with 4 load cells for each bin with option of up to 8 load cells; capacity per load cell of 10,000 lbs. (5,000 kg)

Output - Can be connected to a PC; pulse for remote counter

Power - 220 volt AC

Feedtronic™ 5005

Electronic Bin Weighing System with Load Cells

The Feedtronic 5005 is a precise electronic feed bin weighing system especially designed for feeding in breeder and pullet houses where precise feed control is a must.

- The Feedtronic 5005 can operate two separate feed augers from two different feed bins in order to distribute feed to separate male and female hoppers.
- The Feedtronic 5005 can distribute different quantities of feed to up to 15 different hoppers.
- Feedtronic 5005-5 for up to five hoppers.
- Feedtronic 5005-15 for up to 15 hoppers.

Agro Logic Feedtronic™ 5005

Technical Specifications

Maximum load on 4 legs - 40,000 lbs. (18 mT)

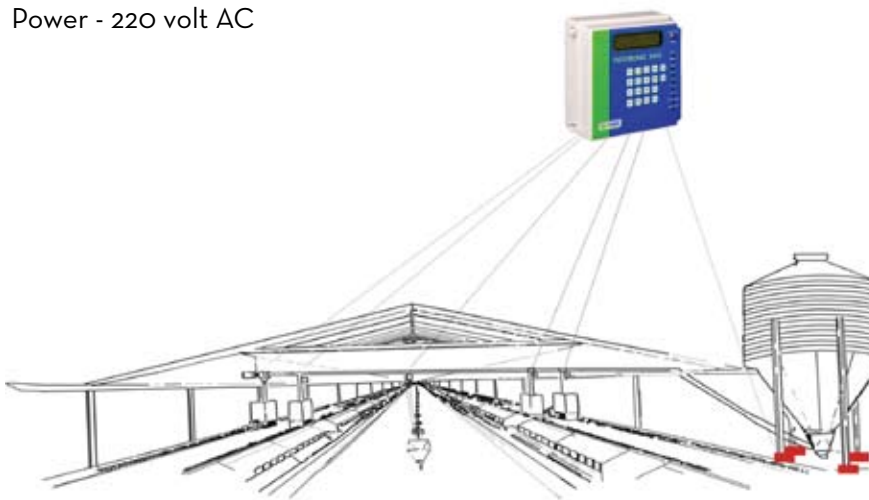

Comes standard with 4 load cells for each bin with option of up to 8 load cells; capacity per load cell of 10,000 lbs. (5,000 kg)

Output - Can be connected to PC; pulse for remote counter

Power - 220 volt AC

Load cell

Restrictive feeding directly from silo on load cell to five hoppers.
