ROXELL®

LaiCa™

Pan Feeding System for Layers

MAXIMUM USE OF YOUR FLOOR SPACE

- The pan's oval shape serves 29 laying hens per pan or 44 birds per meter (39 inches) of feeding length.
- The feeder tubes can be used as a perch while an anti-roost profile helps keep birds from soiling the pans.

A CASCADE-SHAPED PAN FOR OPTIMAL FEED INTAKE

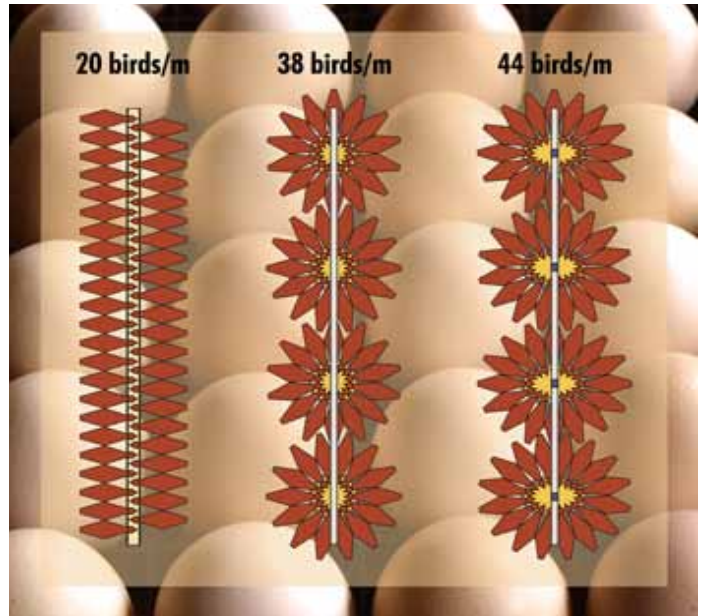

- The unique stepped pan prevents selective pecking and encourages the hens to eat all feed ingredients.
- The special wings on the cone stop the hens from raking the feed.

LAICA™ PAN KEEPS FEED COSTS UNDER CONTROL

- The cascade-shaped pan, incorporated trough in the bottom and pan lock help to make sure that the feed remains in the central part of the pan.
- The LaiCa™ Feeder's high feed saver rim prevents the spilling of feed.
- A handy adjustment ring allows a precise setting of the feed level.
